*Conditions of approval of disinfectants for ships.*

*I. Phenol or Carbolic Acid and Coal Tar Disinfectants generally.*

Coal tar disinfectants are required to be approved by the Governor-General in Council. The approved disinfectant must have a germicidal value, as determined by the Chick-Martin technique as given by the Lister Institute, of not less than that of pure phenol when tested against B. Typhosus and must be miscible with sea-water in the manner described on the containers so as to produce 5 per cent emulsion or solution which shall show no appreciable separation after standing for six hours at the temperature of the air. It must not be unduly poisonous to higher animals and should not have any destructive action on wood, leather, linen or metals.

*II. Chlorine may be carried either in the form of*

*(a) Stabilized Chloride of Lime.*

*Chloride of lime must be dry and suitably stabilised yielding not less than 30 per cent by weight of available chlorine and must be put up in tins of not more than 10 lb. per tin, the date of issue by the manufacturer being stamped on each tin. Each tin and contents, whether partly used or not, must be renewed within one year of the date stamped on the tin. Full instructions for the use of the powder for cleansing decks, bulkheads, masts, lavatory basins, etc., must be given on the label attached to each tin. This material is not to be used for the sterilization of drinking water, nor for the sterilization of dejecta, soiled utensils or apparel of persons suffering from a contagious or infectious disease.*

If stabilized chloride of lime is carried on board ship the quantity of coal tar disinfectant may be reduced by not more than 50 per cent and the amount so reduced must be replaced by an equal weight of stabilized chloride of lime. *Solid chloride of lime disinfectants will be tested for strength, stability, lime and water as follows:—*

(1) The chloride of lime must be of approved quality.  
(2) It must contain not less than 30 per cent of available chlorine.

(3) It must contain not less than 4 per cent of free lime ( $\text{CaO}$ ).

(4) The total water existing in all forms, consisting largely, if not entirely, of water in combination in the form of calcium hydroxide, must not exceed 8.5 per cent.

(5) It must be of such stability that after being kept for four weeks in an oven at  $140^{\circ}\text{F}$  ( $\pm 2^{\circ}$ ) the percentage of available chlorine shall not decrease more than 2%.

*or (b) Stabilized Hypochlorite Solution.*

If a stabilised solution of hypochlorite of soda is preferred to chloride of lime, this preparation may be carried on board in place of chloride of lime, provided the total quantity of available chlorine is the same. The amount of coal tar disinfectant carried may then be reduced by 50 per cent. The conditions and restrictions as to its purpose and use are the same as for chloride of lime. The hypochlorite solution must yield at least 10 per cent of available chlorine. If the solution should at any time decrease in strength so that the available chlorine falls to less than 8 per cent, it must be replaced as soon as possible. The liquid is to be stored in stoneware jars or other containers, of not less than two gallons nor more than 10 gallons capacity, not liable to cause a diminution of the strength of the solution. The jars must be sealed either with stoneware stoppers or with stoppers which have no appreciable action in diminishing

the strength of the solution. Unless it can be shown that the strength of the solution is unaltered, the disinfectant must be renewed at least once a year. The date of sealing the containers and directions for use must be stated on a label adhering firmly to the jar.

*Stabilized hypochlorite solution will be tested for strength and stability.*—The stability of the solution will be tested by maintaining the liquid at  $25^{\circ}\text{C}$  for twenty-eight days when the available chlorine must not have decreased by more than 10 per cent of the total available chlorine originally present.

*or (c) In ships in which a sea-water electrolyser is installed, capable of giving an unlimited quantity of sodium hypochlorite solution containing not less than 0.1 per cent of available chlorine, the quantity of coal tar disinfectant carried may be reduced by not more than 50 per cent. The type of electrolyser must be approved by the Governor-General in Council and subject to inspection from time to time. The conditions and restrictions as to the purpose and use of the hypochlorite solution are the same as those for chloride of lime or hypochlorite solution in tins.*

*III. Stabilized chloride of lime put up in  $\frac{1}{2}$  lb. tins is intended to be used for sterilising drinking water. Instructions for use will be found on pages II—12 of the 1929 edition of the Ship Captain's Medical Guide. The following conditions must be fulfilled before chloride of lime for treatment of drinking water can be approved:—*

(1) The chloride of lime must be of approved quality.  
(2) It must contain not less than 24 per cent and not more than 26 per cent available chlorine.

(3) It must contain not less than 14 per cent of free quick lime ( $\text{CaO}$ ).

(4) The total water existing in all forms, consisting largely, if not entirely of the water in combination in the form of calcium hydroxide, must not exceed 7.5 per cent.

(5) It shall be of such stability that after passing four weeks in an oven kept at  $140^{\circ}\text{F}$  ( $\pm 2^{\circ}$ ) the percentage of available chlorine shall not decrease more than 2.

(6) The powder to be put up in  $\frac{1}{2}$  lb. tins, the date of issue by the manufacturer to be stamped on the base of each tin.

(7) Each tin and contents (except the measure, which may be used again) whether partly used or not, to be renewed within one year following the date stamped on the tin.

(8) Each tin to contain a measure, made of a material resistant to chlorine, to contain 60 grains of the powder, when full, i.e., sufficient to chlorinate approximately 200 gallons of water.

The following disinfectants have been approved by the Governor-General in Council. He may at any time withdraw his approval of any disinfectant that fails to pass the required standard:—

## APPENDIX.

## CONDITIONS OF APPROVAL AND INSTRUCTIONS FOR DRAWING AND SENDING SAMPLES OF DISINFECTANTS AND LIST OF APPROVED BRANDS.

## Instructions for drawing and sending samples of disinfectants.

1. Disinfectants will be tested chemically and bacteriologically. The chemical tests will be carried out at the Government Test House, Alipore, and the bacteriological tests at the Central Research Institute, Kasauli.

Manufacturers, desiring the approval of the Governor-General in Council to disinfectants—coal tar or other—for use on board ship should submit applications to the Secretary to the Government of India, Department of Commerce. A true copy of the application, together with samples drawn in accordance with the instructions detailed below, should at the same time be sent to the Superintendent, Government Test House, Alipore, for chemical examination, and another copy, with samples, to the Director, Central Research Institute, Kasauli, for bacteriological examination. A sum of Rs. 48, being the fee charged for testing a sample chemically, should be paid into a Government Treasury in the name of the Audit Officer, Indian Stores Department, for adjustment under the head, "XXVI-A—Indian Stores Department," and another sum of Rs. 45, being the fee for bacteriological examination, should be paid for adjustment under the head, "XXIII—Public Health, Miscellaneous—Central." The Treasury receipts should be forwarded, respectively, to the Superintendent, Government Test House, Alipore, and the Director, Central Research Institute, Kasauli, along with the true copy of the application and the samples. These officers after conducting the examination will submit their reports to the Department of Commerce and that Department will then issue final orders on the applications.

2. Liquid disinfectants should be thoroughly stirred or shaken according to circumstances before samples are drawn therefrom. In the case of solid disinfectants, specimens should be taken from various points and thoroughly mixed, and the samples required for despatch to the Government Test House, Alipore, and the Central Research Institute, Kasauli, should be drawn from the large sample so obtained. The mixing of the specimens should be carried out as expeditiously as possible so as to avoid undue exposure of the material to the atmosphere.

3. Two representative samples of each disinfectant should be drawn simultaneously from the same container, one for despatch to the Government Test House, Alipore, and the other for despatch to the Central Research Institute, Kasauli.

4. In the case of chlorine disinfectants, samples should not be sent to the Central Research Institute, Kasauli. Only one sample, in such a case, should be drawn and sent to the Government Test House, Alipore.

5. If the disinfectant is a liquid, each sample should consist of at least half a gallon of the material. If it is a solid, two-pound samples should be drawn.

6. Samples of liquid disinfectants should be sent in bottles or in tins, and samples of solid disinfectants should be sent in wide-mouthed bottles.

7. Containers of samples should be scrupulously clean. They may be cleaned with water or petrol according to circumstances, but it is essential that the water or petrol should be completely removed by drying the containers before samples are placed in them. Kerosene should not be used for this purpose, as it cannot be completely removed by drying.

8. Bottles containing liquids should be nearly but not completely filled. If they are completely filled, the stoppers may be forced open by the expansion of the liquid.

9. All containers should be properly sealed to prevent leakage, and bottles should be carefully packed to avoid breakage in transit.

10. Samples should be carefully labelled. A label may be tag securely tied to a package or may be pasted on. If a label is pasted on a tin, it should go all the way round the tin and overlap; otherwise it will probably fall off. The label should state—

- Name of material.
- Name of firm sending sample.
- Number and date of covering letter under which sample is sent.

11. A sample should not be sent without covering letter. The covering letter should state full details of the sample, including a statement of the manufacturer's formula of the product sent.

12. Samples intended for despatch to the Government Test House, Alipore, and the Central Research Institute, Kasauli, should respectively be addressed *exactly* as follows—

The Superintendent,  
Government Test House,  
Alipore, Calcutta.  
The Director,  
Central Research Institute,  
Kasauli.

For the former, if sent by rail on the E.I. Railway or the N.W. Railway, parcels should be consigned to Calcutta—Hhewaniore, E.I. Railway or B.N. Railway, as the case may be. If sent by rail on the E.B. Railway, these should be consigned to Kalighat, E.B. Railway. For the latter, parcels should be booked to Kasauli Out Agency, N.W. Railway, and the railway receipt forwarded to the Director, Central Research Institute, Kasauli.

13. The telegraphic addresses of the Superintendent, Government Test House, Alipore, and the Director, Central Research Institute, Kasauli, are "Simp," Calcutta, and "Problem," Kasauli, respectively.

## Conditions of approval of disinfectants for ships.

## 1. Phenol or Carbolic Acid and Coal Tar Disinfectants generally.

Coal tar disinfectants are required to be approved by the Governor-General in Council. The approved disinfectant must have a germicidal value, as determined by the Chick-Martin technique as given by the Lister Institute, of not less than that of pure phenol when tested against B. Typhosus and must be miscible with seawater in the manner described on the containers so as to produce a 5 per cent emulsion or solution which shall show no appreciable separation after standing for six

No hall tickets will be issued (except to those who have applied to be examined in Typewriting—Lower Grade only), but extracts of the Nominal Lists will be posted on the Notice Board at the entrance to the examination hall two days before the date of the commencement of the examinations and candidates are expected to have their registered numbers from the lists.

Note.—(1) There will be two lists—the one containing the names of candidates for the examinations in all subjects with "Maths etc." and "Co-operative" groups except Typewriting and the other list for Typewriting only, for which subjects the candidates have been assigned separate numbers.

(2) Candidates will distinctly understand that no notice will be taken of any letter requesting to be informed of their registered numbers, etc.

**III.—REGULATIONS TO BE OBSERVED BY THE CANDIDATES.**

*Both at Madras and in the Mysore.*

(i) Candidates in all the subjects must bring with them for use in the examinations their own rules, erasers, knives, pens, pencils, carbon paper and ink of two or more colours (other than black) for map-drawing, drawing lists in stock-keeping, etc.

Candidates in Shorthand will be allowed to transcribe their shorthand notes with a Typewriter. They will not be supplied with any 'thick' paper for the purpose, but will be allowed to bring with them their own 'thick' paper, if they wish to use such paper. The use of carbon paper will on no account be allowed in transcribing the shorthand notes with a Typewriter. If the machine used by a candidate, however, goes out of order, no extra time will be given to him to compensate for loss of time while the machine is out of order and is being put right.

At the end of the period allotted, candidates must give up both their shorthand and longhand performances to the Chief Superintendent for submission to the Examiner.

**(ii) INSTRUCTIONS REGARDING THE EXAMINATIONS IN TYPING.**

*Both at Madras and in the Mysore.*

1. Candidates in Typewriting will have to bring their own Typewriters, inks, erasers, and also the necessary carbon paper with them and must specify clearly on their answer papers, the particular kind of machine used by them as otherwise their answer papers will not be valued.

2. The following is the list of the names of Typewriters recognized for use in the examination—

The Remington, Remington Portable, New Model Remington No. 12; Yost; New Century; Smith Premier; Densmore; Empire; Underwood; Underwood Portable; Oliver; Armstrong; Standard Folding; Stearn's Visible; Sun Typewriter; Fox Visible; Noller; Victor Typewriter—Model No. 3 and No. 10; Moultrie; Kodak; Wood; Stark Standard Visible; Royal Standard No. 10; Rex Visible; Mello; Mercedes; Damajustable; Elite; Imperial Typewriter; British Empire Typewriter; Corcos Portable No. 4; All British Harbeck Typewriter; Royal Portable; Meiss; Kappel; Imperial Typewriter Model No. 40; or L. C. Smith & Bros. machine.

Note.—Only one particular kind of machine should be used by the candidates throughout the examinations.

3. Seats and accommodation for the candidates.—(a) Candidates will be permitted to bring with them for their use at the examination hall their own tables, chairs or stools, if they choose; provided they take care to see that by so doing, they do not give room to the slightest disturbance being caused in the examination hall.

(b) The candidates will be allowed to take their seats in the examination hall five minutes before the appointed hour for giving out the question paper and supplied with the necessary paper for answering and get

their machines ready for work with paper inserted in them and to have their registered numbers at the left hand corner of their answer papers and the particular kind of Typewriter they use at the right hand corner, typed before the question paper is given to them.

4. Candidates are strictly told not to write anything on the question paper itself. Calculations or any other points they wish to note must be written on one of the blank sheets supplied to them and such sheets including the carbon papers should be left on the table. Further candidates are strictly warned not to take carbon copies more than what is required of them in the question paper.

5. The candidates will, if necessary, be examined in batches but at least every four candidates for the Lower Grade, at least every ten candidates for the Higher Grade, must have one machine among them.

6. Managers and Instructors of institutions concerned are expected to see that their pupils are supplied with Typewriting machines in proper working order.

7. Managers and Instructors will be allowed into the examination hall in the intervals between the various batches to inspect the machines and to remedy any defects. They should take care to see that they do not remain in the examination hall while the question paper is being distributed to the candidates in the examination hall or while their pupils are answering the question papers.

8. If, however, a candidate reports to the Superintendent that his machine has gone out of order, the Superintendent will intimate this to the Manager or Instructor, if he is waiting outside on the premises, and will permit such Manager or Instructor to enter the hall (though the candidate may be at work) to inspect the machine and to remedy the defect or to supply another machine. It must, however, be clearly understood that the Superintendent bears no responsibility in this matter; his action will be purely *ex gratia*, the whole responsibility resting on the candidate and the Manager or Instructor.

A similar concession will be allowed in the case of a private candidate, if he has someone outside who is willing to inspect the machine and put it right, etc.

An extra time will be given to candidates to compensate for loss of time while the machine is out of order and is being put right.

*In the Mysore.*

Bands of Institutions who are desirous that their pupils should be examined in batches and private candidates who desire to be similarly examined should make the necessary arrangements with the Chief Superintendent concerned four days before the examinations and furnish him with all the necessary information as to the number of candidates and machines and the time at which each batch will attend on the day fixed for the examinations.

*At Madras.*

**Lower Grade—Candidate's Hall Ticket.**—Tickets of admission specifying the particular batch (first or second) and as far as in which the candidates elect to appear will be issued on Thursday, the 26th April, between 11 a.m. and 5 p.m. at the Office of the Commissioner for Government Examinations, Old College, Nungambakkam. These tickets should be shown at the entrance to the examination hall. Candidates who produce tickets will be admitted to the batch specified in the tickets. Candidates who do not provide themselves with tickets cannot claim to be admitted to any particular batch. They will be admitted only, if space remains available in the hall, i.e., after seats are reserved for those who have registered their names and obtained tickets for this batch. Candidates who do not hold tickets will accordingly have to wait at the entrance to the examination hall from the hour of commencement of the first batch and take their chance of being provided with seats in the first or any subsequent batch. To avoid all inconvenience and possible disappointment, heads of institutions who are desirous that their pupils should be examined in batches and private candidates who desire to be similarly examined are particularly requested to call at the office on Thursday, the 26th April, with all the necessary information as to the number and name of candidates that will attend at the particular batch on the day fixed for the examination and obtain tickets of admission accordingly. No tickets can be issued except to candidates who are registered with institutions or to private candidates.

Candidates that have each a separate machine and that do not want to be examined in batches are entitled to appear for their examination with the third batch in the Lower grade. But this does not preclude them from registering their names for that batch and obtaining tickets accordingly.

Candidates for the Higher grade may appear for the first or second batch at their option and no tickets accordingly are issued for this grade.

**Instructor's Hall Ticket.**—Managers of Institutes of Institutions and other persons who wish to be allowed into the examination hall in the intervals between the examinations of the various batches to inspect the machines and remedy any defects, are requested to call at the office on Thursday, the 27th April, and have their names registered. Tickets of admission specifying their names, the institutions to which they belong, etc., will be issued to them and these should be produced at the entrance to the examination hall.

Both at *Moors* and in the *Infirmary*.

(iii) Attention is particularly drawn to the following rules:—

1. No candidate will be allowed to enter the examination hall unless he wears a clean and decent dress, and in all cases where good manners require it, a suitable covering for the head, nor will he be allowed to keep his shoes on unless they are shoes of English pattern, and socks and trousers are worn also.

No candidate suffering from any contagious disease will be admitted to the examination hall.

2. Candidates are expected to take their seats in the examination hall at least five minutes before the time fixed for giving out the question papers. No candidate will be allowed to quit the examination hall on any day until the expiration of half an hour from the time fixed for the commencement of the examination and candidates arriving after the expiration of that half hour will not be admitted.

3. No candidate will be allowed to re-enter the examination hall during the hours of examination after once quitting it, nor to leave the hall without finally giving up his answer papers.

4. Strict silence should be maintained in the examination hall.

5. No candidate will, on any account, be allowed to take into the examination hall notes, books, or portions of a book, ruled sheets, manuscripts or papers of any kind. Any candidate detected in the violation of this rule or detected in speaking to, or in any way communicating with or copying from each other and in communicating with any other person outside the examination hall or having recourse to any unfair practices will be sent out of the hall forthwith, and his conduct reported to the Commissioner for disciplinary action. The use of mathematical instruments for drawing figures or ruling lines will, however, be allowed.

6. Candidates are forbidden to note down the answer to any question on the question paper itself; they will not be allowed to take any papers, except their question papers, out of the examination hall.

7. Candidates are forbidden to tear up paper, or to throw ink or papers on the floor. All 'spoilt' copies, etc., should be left on the desk where the candidate has been writing.

8. Candidates may have to write their answers on both sides of the paper supplied to them and they will receive the necessary instruction on this point in the examination hall from the Chief Superintendent of the examinations.

9. No candidate will be allowed to exceed the time assigned to each paper.

10. As soon as candidates have finished writing their answers and wish to give up their answer papers, or at the end of the period prescribed for each particular part of the examination, each should rise from his seat and remain standing until one of the Superintendents has gone up to him and has received his answer paper from him. Any candidate wishing to ask any question of the Superintendent will pursue the same course but will do so account leave his seat.

11. Candidates whose names are not in the printed list furnished to the Chief Superintendent must submit a written declaration through the Chief Superintendent giving full particulars in regard to themselves including their address, and furnish such evidence as may be possible of their having applied for admission to the examinations at the proper time and paid the prescribed fees. The answer papers of such candidates will not be valued unless it is clear that the omission of their names is due to no fault of theirs.

12. Candidates are requested to note carefully the particulars printed in the nominal list and satisfy themselves whether they tally with those given by them in their applications for admission to the examinations, so that any attention with regard to their initials, names

or class of community or any other correction that may appear necessary might be pointed out by them in writing to the Chief Superintendent.

13. Candidates choosing to change their place of examination without previous permission, or appearing at any centre other than the one at which they ought to have appeared according to the notice published in the Gazette, must not expect to have their papers valued or their results published. In all cases where permission has been granted, the memorandum or letter, permitting the change should be produced for the satisfaction of the Superintendents.

14. The answer papers should be stitched or pinned together at the upper left hand corner, and the whole folded into two, lengthwise (not crosswise into four). The register number, the place of examination and also (in the case of the examinations in Shorthand, the particular system adopted) and (in the case of the examinations in Typewriting, the name and Model number of the Typewriter used) should be written out clearly by the candidates on the top right-hand side of the first page of the answer paper, as well as on the top of the paper after it is folded.

(N.B.—(i) Candidates are strictly forbidden to write or type their names on the answer paper.

(ii) Candidates should distinctly understand that (a) if to furnish even one of these particulars may lower the reputation of writing their answer papers—particularly any answer paper which up without the candidate's register number and name of centre will not be valued.)

15. Any candidate who does not behave properly towards the Chief and Assistant Superintendents of the examinations or is suspected of having had recourse to malpractice of any kind in connection with the examination or whose answer papers contain objectionable matter, is liable to have his examination invalidated and also to be debarred from appearing again for any of the examinations under the control of the Commissioner for such time as the Commissioner may think fit; or, if the Commissioner is not satisfied for any reason whatever as to the trustworthiness of his results, he may be required to undergo a re-examination at some future date to be fixed by the Commissioner in any one or more of the subjects of the examination for which he appeared, his success or failure being determined on the results of such re-examination.

16. Candidates are forbidden to communicate with the Examiners; should they do so, their answer papers will not be valued and further their conduct will be reported to the Commissioner for any action that he may deem fit.

17. No information can be furnished in regard to the results of a candidate in any subject or in regard to the marks obtained by him or in regard to the particular section or subdivision in which he may have failed. The names of successful candidates in each subject arranged in two classes, First and Second, will be published in the *Fort St. George Gazette*. The pass-list for each grade of a subject as published in the Gazette is complete and final. Applications from or on behalf of unsuccessful candidates asking for information as to the cause of failure or for a revaluation of the answer papers will not be attended to. No revaluation of answer papers is practicable.

The tenderer shall examine closely the Madras Detailed Standard Specifications, and also the Standard Preliminary Specification contained therein, and sign the Divisional office copy of the Madras Detailed Standard Specifications and its addenda volume in token of such study before submitting his tender with rates which shall be for finished work *in situ*. He shall also carefully study the drawings and additional specifications and all the documents which form part of the agreement to be entered into by the accepted tenderer. The Madras Detailed Standard Specifications and other documents connected with the contract such as specifications, plans, descriptive specification sheet regarding materials, etc., can be seen at any time between 11 a.m. and 5 p.m. on office days, in the office of the Executive Engineer, Tinnevelly Division.

6. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specification." Materials conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly.

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work. He should also inspect the quarries, and enquire himself about the quality and availability of materials. The names of quarries, kilns, etc., wherefrom certain materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained from the quarries or other sources defined shall be used on the work. In every case the materials must comply with the relevant Standard Specification. Samples of materials as called for in the Standard Specifications, or in this tender notice, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to the work is begun. If the contractor, after examination of the sources of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the Standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specification Sheet, he shall so state clearly in his tender and state wherefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract, pay any extra charges for lead or for any other reason, in case the contractor is found later on to have misjudged the materials available. Attention of the contractor is directed to the Standard "Preliminary Specification" regarding payment of premium, tolls, etc.

8. The tenderer's particular attention is drawn to the sections and clauses in the Standard "Preliminary Specification" dealing with—

- (1) Test, inspection and rejection of defective materials and work.
- (2) Cartage.
- (3) Construction plant.
- (4) Water and lighting.
